

DATA VISUALIZATION DESIGN

EXERCISES

DESIGN EXERCISE 2

Collecting data

Design exercise 2: Collecting data

- **14:15-14:25:** Introduction to data collection exercise
- **14:25-15:00:** Reflect upon existing data about you
- **15:00-15:15:** Break
- **15:15-16:00:** Work on project description/design brief
- **16:00 - ??:** Fridaybar and 48 hour break – *remember the 2 hand-ins on Thursday (2/3)!*

Design exercise: Find data that are already collected

Sit in your groups – but find data about yourselves!

- Find some data that you have already collected about yourself (examples in next slide)
- Reflect upon the data —> how could you visualize it?
- Visualize/sketch the data on paper

Don't use the computer for visualization!

Remember: to take pictures and document your process --> useful for your hand-in (2/3)!

Examples of data that is already collected

- Look in your photos and when (or where) you have taken pictures
- Look on Messenger and note who and when you have chatted with XXX person/people
- When have you been active on social media?
- Step counter on your phone
- Games you have played
- What movies and/or series you have watched on Netflix
 - Ex. Count different movie genres
 - Ex. Count how many movies/series

BREAK

15:00-15:15

Work on project description/design brief:
Hand-in 2/3

Work on project brief

Read the project brief description on LearnIT

- Discuss your ideas – maybe you have been inspired by the examples from the lecture?
- Clarify in your group how "sensitive" your collected data must be
- You have to agree on *one* data source which you will work with in you group work (exam)
- Determine how long time you plan on spending in the data collection phase
- Etc.

THANK YOU!

HAND-INS

~~HAND-IN 1: 23/02~~

HAND-IN 2: 02/03

DESIGN BRIEF: 02/03

HAND-IN 3: 09/03

HAND-IN 4: 16/03

HAND-IN 5: 23/03

HAND-IN 6: 30/03
